

## N4Monitor ADVANCED NETWORK MONITORING SOLUTION

N4Monitor is a proven and reliable network monitoring solution that utilises PRTG software developed by Paessler, a market-leading supplier of network monitoring technology.

Adopted by over 150,000 system administrators worldwide, N4Monitor is trusted by us to ensure the performance of our own Data Centres and Infrastructure and is an integral part of our managed service provision, which includes:

ConnectMPLS networks, national high speed Internet, state of the art Colocation, SIP trunking, Hosted Telephony, Cloud Infrastructure and Data backup.

Delivered over our fully resilient Network Core, N4Monitor is a failover tolerant monitoring system that is designed to make your network faster, more responsive and more reliable.

N4Monitor can be tailored to suit any organisation that wants cost effective, scalable, high performance and secure network monitoring and is available as an off the shelf package if you would prefer to manage your own devices.

### KEY BENEFITS

#### PEACE OF MIND

A proven and reliable 24/7/365 monitoring system ensures your network's performance and availability.

#### IMPROVED SERVICE

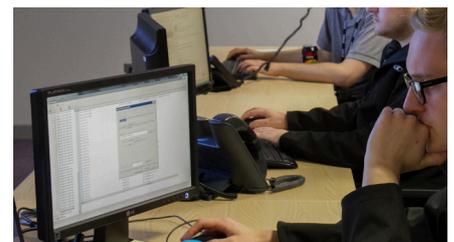

Deliver a better service to your employees and customers by being one step ahead of potential issues.

#### BUSINESS CONTINUITY

Real time monitoring can detect and diagnose problems quickly and minimise the impact and cost of an outage.

#### SAVE MONEY

A low cost, per device service that enables you to focus your IT resources on other business issues.
