

Colocation

Your equipment in Node4 Data Centres.

Your equipment in our secure and resilient hosting Data Centres. Reduce cost and complexity while keeping your investment safe and secure.

- ✦ **Sweat your existing investment**
- ✦ **Use of expert, on-site team as remote hands and eyes, rather than waiting for your team to get to site**
- ✦ **Tight security in ISO27001 accredited Data Centres that are manned 24 hours a day, 7 days a week**

Public Cloud

Your workload on N4Compute platform.

Access flexible computing resources (server, storage, network) from our secure, shared platform with flexible OPEX pricing.

- ✦ **Pay OPEX for projects instead of buying hardware**
- ✦ **Remove headache of procuring kit**
- ✦ **Easy, fast setup of new projects - getting to business value quicker**
- ✦ **Free your IT team to work on strategic projects**

Private Cloud

Your workload on dedicated equipment.

Server, storage and network resources dedicated to you and hosted within one of our state of the art Data Centres.

- ✦ **Meet compliance regulations**
- ✦ **Invest in capital equipment**
- ✦ **Take advantage of your special pricing with vendors**
- ✦ **Get access to deeper hypervisor functions**

Hybrid Cloud

Ideal combination of Colocation, public & private.

Experience the best of all worlds. For example, run your website on collocated equipment and your test environment on a public cloud.

- ✦ **Cost-effective model that balances ongoing usage and peaks in project demand**
- ✦ **Sweat assests and transition over time to cloud**
- ✦ **Reduced capital expenditure**
