

N4BaaS - Office 365 Backup

Simple, secure independent backup of Office 365 Content

N4BaaS Office 365 Backup is a comprehensive solution that enables businesses using Office 365 to secure an independent backup of all Office 365 content to a Node4 Data Centre. This service supplements the standard Microsoft resilience of Office 365 services.

The solution is a fully managed solution based on Veeam's industry leading backup portfolio. The service is inclusive of setup, configuration, scheduling, backup job monitoring and fully assisted restoration via the Node4 service desk.

The solution is based on an OPEX pricing model allowing competitively priced bundles that include all required Veeam licensing and backup storage capacity.

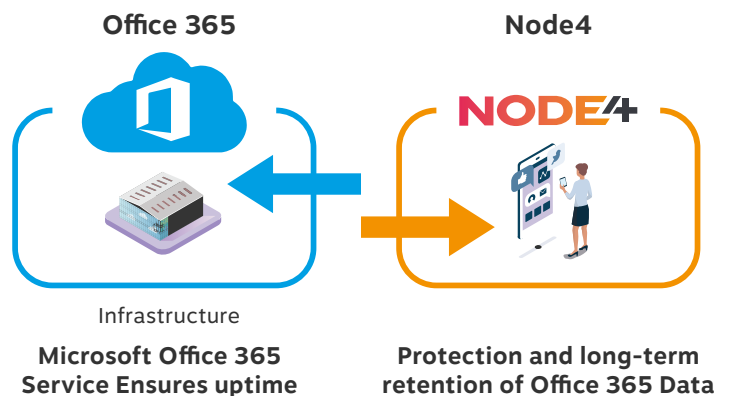

Setup of the service is rapid requiring only minimal information from the customer. Protection starts almost immediately alleviating concerns that accidental or malicious data loss propagates through the geo-redundant Office 365 environment.

Restoration including granular search for objects such as mailboxes, files folder is supported via the Node4 support desk, ensuring efficient recovery without tying up customer technical staff.

All N4BaaS service are supported by our expert engineers 24x7x365. Our Veeam Office 365 backup service is underpinned by the same enterprise class computing and storage platforms that deliver our award-winning cloud services.

Key Benefits

✓	Save time and money Purchase Node4 bundles and secure any size of Office 365 estate including Exchange Online, SharePoint and OneDrive quickly and easily.
✓	Fast and simple No complex configuration – provide Office 365 tenant credentials and initial storage requirements, Node4 do the rest.
✓	Security Certainty that your business-critical data and data that might be subject to litigation is under your control and independently stored.
✓	Non-disruptive Nothing changes in the Office 365 tenancy or your administration of it, Node4 manage all backup and restoration events.

Save time and money

Managed Service

No need to create an on-premise repository or secondary cloud location nor devote technical resources to fully securing your Office 365 data.

Benefit from our investment

Node4 has invested in cutting edge Cisco and NetApp technology to help reduce the cost of storage to hold your backups. Pay just for the backup resources you need, rather than investing in dedicated systems.

Avoid setup and administration

The Node4 BaaS team provide a “ready to run” service requiring only a few simple details to secure your data.

Lower Management Costs

Decide the backup policy(s) that suit your business and let Node4 do the rest. In the event that a data loss event takes place, we are here to support you and manage recovery of data whether it's one file or a major loss.

Easy Growth

Simple starter bundles are supplemented by additional user packs allowing the Office 365 backup service to precisely match your needs in terms of user and storage capacity.

Fast and simple provisioning

Easy to work out what you need

The base N4BaaS for Office 365 service supports 25 users and provides 1TB of capacity. Backup capacity is pooled between users providing maximum flexibility. Add more users as required, extend storage or both, the choice is yours.

No additional requirements

N4BaaS for Office 365 is a fully managed service, you don't need to purchase licensing or cloud resources to ensure your Exchange, SharePoint and OneDrive and Teams data is secured.

Simple to get started

N4BaaS for Office 365 operates as a managed service which means you simply provide your tenant credentials and any particular backup policies desired.

Security

Secure Data Centres

Our services are delivered from our state of the art UK Data Centres which operates the highest level of physical security. Perimeter security fencing, PIR sensors, strict access policies, zonal swipe card systems, 24/7 manning of all sites and extensive CCTV coverage all ensure that the platform is protected from intrusion at all times.

Storage

All Node4 backup services are based on NetApp high-availability enterprise class storage.

Legal and Compliance

The N4BaaS for Office 365 service ensure that you can meet legislative and compliance regulations with efficient eDiscovery of backup items. In addition, the Office 365 backup service offers a protection report that can identify unprotected mailboxes.

Peace of mind

Veeam Platinum Service Provider

Node4 is recognised as a leading Veeam Platinum Cloud Service Provider (VCSP) delivering a wide range of cloud integrated services

NetApp Support Service Provider

Node4 is a long-standing partner of NetApp and is recognised as a NetApp Cloud Service Provider with NetApp Professional Services Certification and NetApp Support Services Certification.

Expert Engineers

Node4 Cloud and Backup services are provided with 24x7x365 support from our expert engineers, who keep all our cloud platforms healthy and operational.

Non-disruptive

Office 365 Tenancy is unchanged

Your Office 365 environment is unchanged, you don't need to change any administrative processes in order for Node4 to secure your data.

Restoration or eDiscovery is Easy

No need to devote time to recovery of key emails, files or folders. One call to Node4 service desk invokes your recovery or discovery event.
