The Node4 SOC

A team of Security Specialists protecting your business 24/7

At the heart of Node4 lies a 24/7 Security Operations Centre (SOC) which detects and prevents cyber security breaches that happen within your organisation. Our SOC provides you with an enterprise-class security and fraud detection facility as an extension to your own IT department.

The SOC merges state-of-the-art technology with our team of expert security analysts who monitor and protect your key assets and network 24 hours a day, 365 days a year.

To truly protect your environment, you need more than just the correct software. You need the experts on hand to ensure that the software works efficiently for you.

We can evaluate your security situation and detect and prevent threats before causing costly damage to your business.

What Node4'S SOC does for you

- Monitors your public, hybrid cloud and on-premise infrastructure

- Protects your key business assets

- Evaluates user behaviour patterns

- Detects and defeats malware, viruses, ransomware and Trojans

- Notes behaviour indicating policy violations, vulnerable software and suspicious communications

- Continuously monitors your network for vulnerabilities

Monitored by Specialised Security Experts
Our SOC experts use industry-leading products combined with state-of-the-art security tools to ensure the best protection possible for your applications. We also hold security certifications, including: CEH, CSPA, CISSP and more.

Proactive Methodology
Security experts proactively perform security tasks such as vulnerability assessments, malware research and penetration testing.

Dashboards and Reporting
SOC services include access to a custom dashboard, giving you full visibility of live threats. Chat online with Node4 experts, review traffic, policies, and attack mitigation reports.

Reducing the attack surface
Rather than just waiting for attacks to happen, Node4 SOC is proactively assessing your security posture to highlight any weaknesses in your infrastructure before they become compromised.

In-depth defence
Node4 has the expertise to help you assess your business security requirements from Cloud, mobile device management, endpoint protection and employee security awareness. All managed from a centralised location.

Key Benefits

✔	Monthly fee; no capex outlay
✔	Access to our experts for far less than the cost of an in-house team
✔	A custom-build dashboard, allowing you access to all activity and reporting
✔	Threat intelligence services manage policy access to harmful sites
✔	Frequent, detailed reports regarding attempted attacks and threats which have been thwarted
